

YEAR 6 – Computer Science Term 2

Dear Parents,

During Term 2, students will be using a fun and interactive platform on code.org to learn about web development. This unit of work complements our integrated studies unit of Geography. Students will work with the teacher to study topics such as:

- How the Internet works
- Basic computer programming
- Logic, problem solving and creativity
- Creating a simple website

Oakleigh South Primary School and Code.org will assign the utmost importance to student safety and security during the course to maximise student privacy. In particular, participation in this course doesn't require sharing of private student information, nor will their website go live to the public.

For more information of what student data is sorted and protected by Code.org please, visit <http://code.org/privacy> (<http://code.org/privacy>)

Should you have any further queries, please don't hesitate to contact Anthony Rowe – Year 6 Team Leader, rowe.anthony.j@edumail.vic.gov.au.

Regards,
Year 6 Team
