

Dear parents,

These school holidays, July 10-12, we are hosting a very special school holiday program called Code Camp where your child can learn to code and build their very own iPhone or Android app!

Code Camp has already taught more than 35,000 students in Australia and is a great way to spend time over the holidays as kids have lots of fun with friends while learning important new skills such as logic, creativity, problem solving, app development and game building in a fun and engaging way, ready to take on the digital world of the future.

Every child attending a holiday camp will build incredible games on our software platform "Code Camp World" and walk away with their very own app, playable via the Code Camp App store that they can take home to share with family and friends!

Here is the code camp we are running:

Spark (School Grades 2-6)

Beginners + Intermediate

Fun, engaging and challenging... and are our most known Code Camp that over 12,000 students have completed. Code Camp Spark is where every student in years 2-6 should start their Code Camp journey.

Enrol today and help your child become a coding superstar! For more information, visit <http://www.codecamp.com.au> or contact us at hello@codecamp.com.au.

Thank you,

Ron Cantlon
