

Order an Oakleigh South Primary School Worm Pack (worms bred in the village) Year 3 families

RECYCLE all of your organic waste into beautiful garden compost and help to reduce foodstuffs going to landfill.

The Year 3s are trying to encourage their families to become active recyclers and carers for our environment. The farmers are culling our thriving worm farms to make up special compost worm recycling kits.

Each kit will contain approx. 500 fat hungry compost/ red/ tiger worms and will include detailed instructions on how to set up your own worm farm. Alternatively with a slight modification (placing your compost bin on a bed or wire) you can add our compost worms to your current compost bin.

Funds raised will go towards the cost of a giant worm farm for the village.

OUR "Earth Repair Worm kit" will reduce foodstuffs going to landfill and provide you with wonderful castings for your garden.

Please pay on QKR and return form below to the village. Orders will be filled as come in - while worm stock lasts. Please note - the kit contains a worm starter pack and instructions - you will need to set up your own farm. Is this for you? See over for part of the home instructions... full instructions provided with order.

The 2018 Grade 3 Villagers ☺))))

Yes !!! We would like to order an Earth Repair Worm Kit for \$10
(\$49.90 per 1000 at Bunnings!

I have paid on QKR!
